Micro Flo Company

CAPTAN 50-WP
A Fungicide For Plant Disease Control

Captan 50 Wettable Powder is a microfine wettable powder for use in water as a spray for the control of certain funguses of fruit and ornamental crops, and as a soil treatment for the control of certain seed rots and damping-off diseases.

ACTIVE INGREDIENTS:
*Captan .......................................................... 48.9%
Related Derivatives ..................................... 1.1%
INERT INGREDIENTS: ......................................... 50.0%

TOTAL ............................................................... 100.0%

*N-Trichloromethylthio-4-cyclohexene-1,2-dicarboximide
EPA Reg. No. 10182-145-51036 EPA Est. No. 51036-GA-1
AD 062494

KEEP OUT OF REACH OF CHILDREN
DANGER PELIGRO

CAUSES IRREVERSIBLE EYE DAMAGE
Si usted no entiende la etiqueta, busque a alguien para que le explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

STATEMENT OF PRACTICAL TREATMENT

FIRST AID: If a known exposure occurs or is suspected, immediately start the procedures given below and contact a POISON CENTER, PHYSICIAN, OR THE NEAREST HOSPITAL. Describe the type and extent of exposure, the victim’s symptoms and follow the advice given.

IF IN EYES:Flush with plenty of water. Call a physician.

IF SWALLOWED:Drink promptly a large quantity of milk, egg whites, gelatin solutions, or if these are not available, drink large quantities of water. Avoid alcohol.

IF INHALED:Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

IF ON SKIN:Wash with plenty of soap and water. Get medical attention if abnormal reaction occurs.

FOR 24-HOUR EMERGENCY MEDICAL ASSISTANCE, CALL 1-800-F-A-S-T-M-E-D (327-8633).

FOR CHEMICAL EMERGENCY: Spill, leak, fire, exposure, or accident call CHEMTREC 1-800-424-9300.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER
Causes irreversible eye damage. Harmful if swallowed or inhaled. May cause allergic skin reactions. Do not get in eyes. Avoid contact with skin and clothing. Avoid inhalation of dust or spray mist.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers (other than mixers and loaders) must wear:

1. Long-sleeved shirt and long pants
2. Waterproof gloves
3. Shoes plus socks
4. Protective eyewear

Mixers and loaders must wear:

1. Long-sleeved shirt and long pants
2. Waterproof gloves
3. Shoes plus socks
4. Protective eyewear
5. Chemical-resistant apron when mixing or loading
6. Dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C)

Follow manufacturer’s instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

When handlers use closed systems, enclosed cabs or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:

1. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
2. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
3. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not clean equipment or dispose of equipment washwaters in a manner that will contaminate water resources.

STORE IN COOL, DRY PLACE—PROTECT FROM EXCESSIVE HEAT

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 days.

EXCEPTION: For the last 48 hours of the REI, workers may enter the treated area to perform hand labor or other tasks involving contact with anything that has been treated, such as plants, soil, or water, without time limit, if they wear the early-entry PPE listed below.

EXCEPTION: The restricted entry interval (REI) for strawberries is 24 hours. After expiration of the 24 hour period, no personal protective equipment is required.

PPE required for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil, or water, is:

1. Coveralls
2. Waterproof gloves
3. Shoes plus socks
4. Protective eyewear

Notify workers of the application by warning them orally or by posting warning signs at entrances to treated areas.

Read all precautions and directions for use before using. Use only for claims listed and only as specified on this label.

In order that pesticide residues on food and forage crops will not exceed federal tolerances, use only at recommended rates and intervals, and do not apply closer to harvest than specified. Do not apply or allow to drift to adjoining food, fiber or pasture crops. Drift of Captan 50-WP onto sensitive crops (e.g. D’Anjou pears) can cause severe phytotoxicity and crop loss.

Consult State Agricultural Experiment Stations or State Agricultural Extension Service for additional information, as the time of applications needed will vary with the local conditions.

COMPATIBILITY AND PLANT SAFETY

Captan 50-WP can be combined safely and effectively at recommended dosage rates with most commonly used fungicides and insecticides, with the exception of oil and strongly alkaline materials. Alkaline materials such as spray lime and strongly alkaline materials such as spray lime and strongly alkaline materials such as spray lime and strongly alkaline materials such as spray lime and strongly alkaline materials such as spray lime and strongly alkaline materials such as spray lime and strongly alkaline materials such as spray lime and strongly alkaline materials such as spray lime. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

spectrum, use the lower rate in tank mixtures. Do not apply more than 25 lbs.

by air. Apply in red bud, bloom, 75% petal fall, and cover sprays. To reduce the

20 to 250 gallons of water using ground equipment or in 5 to 20 gallons of water

Brown rot blossom blight, brown rot (fruit), leaf spot—Apply 3 to 4 lbs. Captan

APPLES (Eastern U.S.):

Fructus and NUT CROPS ALMONDS:

Brown rot twig and blossom blight, shothole, scab, leaf blight—Apply 4 to 9 lbs. Captan 50-WP per acre in 20 to 300 gallons of water using ground equipment or in 5 to 20 gallons of water by air. Apply at 5 to 7 day intervals as needed to maintain control in prebloom, bloom, petal fall and first cover sprays. Do not apply more than 64 lbs. of Captan 50-WP per acre per crop cycle. May be applied up to day of harvest. Powdery mildew—if powdery mildew is a problem add 6 to 12 lbs. sulfur per acre when Captan 50-WP is used alone. To reduce the potential for disease resistance development to other fungicides having a similar spectrum, Captan 50-WP may be used in a tankmix at a rate of 4 to 6 lbs. per acre. Apply at popcorn, bloom and petal fall stages and up to 5 days after petal fall. Do not apply within 30 days of harvest. Hulls may be fed to livestock. Do not apply more than 45 lbs. per acre per crop cycle. (See General Use Precautions section for definition of crop cycle.)

APPLIES (Eastern U.S.):

Primary scab, black rot (frogeye), botrytis blossom-end rot—Apply 8 lbs. Captan 50-WP per acre in 20 to 400 gallons of water using ground equipment or in 5 to 20 gallons of water by air. Apply at 5 to 7 day intervals as needed to maintain control in prebloom, bloom, petal fall and first cover sprays. Do not apply more than 64 lbs. of Captan 50-WP per acre per crop cycle. May be applied up to day of harvest. Powdery mildew—if powdery mildew is a problem add 6 to 12 lbs. sulfur per acre when Captan 50-WP is used alone. To reduce the potential for disease resistance development to other fungicides having a similar spectrum, Captan 50-WP may be used in a tankmix at a rate of 4 to 6 lbs. per acre. Apply at popcorn, bloom and petal fall stages and up to 5 days after petal fall. Do not apply within 30 days of harvest. Hulls may be fed to livestock. Do not apply more than 45 lbs. per acre per crop cycle. (See General Use Precautions section for definition of crop cycle.)

APPLIES (Western U.S.):

Primary scab—Apply 4 to 8 lbs. Captan 50-WP per acre in 20 to 400 gallons of water using ground equipment or in 5 to 20 gallons of water by air. Apply at 5 to 7 day intervals as needed to maintain control in prebloom, bloom, petal fall and first cover sprays. Do not apply more than 64 lbs. of Captan 50-WP per acre per crop cycle. May be applied up to day of harvest. Powdery mildew—if powdery mildew is a problem add 6 to 12 lbs. sulfur per acre when Captan 50-WP is used alone. To reduce the potential for disease resistance development to other fungicides having a similar spectrum, Captan 50-WP may be used in a tankmix at a rate of 4 to 6 lbs. per acre. Apply at popcorn, bloom and petal fall stages and up to 5 days after petal fall. Do not apply within 30 days of harvest. Hulls may be fed to livestock. Do not apply more than 45 lbs. per acre per crop cycle. (See General Use Precautions section for definition of crop cycle.)

APRICOTS:

Brown rot (twig blight), jacket rot—Apply 3 to 5 lbs. Captan 50-WP per acre in 20 to 250 gallons of water using ground equipment or in 10 to 20 gallons of water by air. Apply in red bud, bloom, 75% petal fall, and cover sprays. To reduce the potential for disease resistance development to other fungicides having a similar spectrum, Captan 50-WP may be used in a tankmix at a rate of 4 to 6 lbs. per acre. Make 1 or 2 applications with late cover sprays and 1 final spray prior to harvest. Do not apply more than 64 lbs. of Captan 50-WP per acre per crop cycle. May be applied up to day of harvest. Note in California: Do not apply after 75% petal fall.

BLUEBERRIES (Eastern U.S.):

Botrytis gray mold or berry rot, mummy berry—Apply 5 lbs. Captan 50-WP per acre in sufficient water for thorough coverage or a minimum of 5 gallons of water by air. Start spray program when buds swell or when buds have loose scales. Repeat at 7 day intervals through blossom period. Repeat at 7 to 10 intervals from late bloom. Do not apply more than 70 lbs. per acre per crop cycle. May be applied up to day of harvest.

BLUEBERRIES (Western U.S.):

Botrytis gray mold or berry rot, mummy berry—Apply 2 to 5 lbs. Captan 50-WP per acre in 20 to 200 gallons of water by ground or in 5 to 20 gallons of water by air. Begin at mid-bloom, repeat at 7 to 10 day intervals until maturity. Do not apply more than 70 lbs. per acre per crop cycle. May be applied up to day of harvest.

CHERRIES (Eastern U.S.):

Brown rot, leaf spot, Botrytis rot—Apply 4 lbs. Captan 50-WP per acre in 20 to 200 gallons of water using ground equipment or in 10 to 20 gallons of water by air. Apply in prebloom, bloom, petal fall, shuck, cover, and preharvest sprays. Applications at 3 to 4 day intervals may be necessary during bloom to control blossom blight. Repeat applications at 7 to 20 day intervals as needed to maintain control up to start of harvest. If powdery mildew is a problem add 6 lbs. sulfur per acre to the petal fall, shuck and early cover sprays. If sulfur is added, Captan 50-WP may be reduced to 2 lbs. per acre in these sprays. Do not apply more than 28 lbs. per acre per crop cycle. May be applied up to day of harvest.

Post harvest sprays: leaf spot—Apply 4 lbs. Captan 50-WP per acre in 20 to 200 gallons of water using ground equipment. Apply immediately after harvest and repeat application in 10 to 14 days.

CHERRIES (Western U.S.):

Brown rot blossom blight, brown rot (fruit), leaf spot—Apply 3 to 4 lbs. Captan 50-WP per acre in 20 to 200 gallons of water using ground equipment or in 10 to 20 gallons of water by air. Apply in prebloom, bloom, petal fall, shuck, cover and preharvest sprays. Do not apply more than 28 lbs. per acre per crop cycle. May be applied up to day of harvest.

GRAPEFRuits:

Powdery mildew, suppression of disease(s). If you are unaware of the climatic conditions least favor disease(s). If you are uncertain of the climatic conditions most favor disease(s). Do not apply more than 64 lbs. per acre per crop cycle (including postharvest sprays). Preharvest sprays may be applied up to day of harvest.

**PLUMS, FRESH PRUNES (Eastern U.S.):**
Brown rot—Apply 6 lbs. Captan 50-WP per acre in 20 to 300 gallons of water using ground equipment or in 10 to 20 gallons of water by air. Apply in full pick, bloom and petal fall sprays. Repeat applications at 7 to 14 day intervals as needed to maintain control. Continue applications through harvest if conditions favor brown rot. The addition of a neutral spreader has improved coverage. Do not apply more than 54 lbs. per acre per crop cycle. May be applied up to day of harvest.

**PLUMS, FRESH PRUNES (Western U.S.):**
Brown rot—Apply 4 to 6 lbs. Captan 50-WP per acre in 20 to 300 gallons of water using ground equipment or in 10 to 20 gallons of water by air. Use lower rates when tankmixes with fungicides of similar spectrum of activity are used. Apply at green bud, popcorn, bloom and petal fall stages. Repeat in cover sprays as conditions warrant.
Prune russet scab (lacy scab)—Apply 4 to 6 pounds Captan 50-WP per acre in 20 to 300 gallons of water using ground equipment. Apply at full bloom. Do not apply more than 54 lbs. per acre per crop cycle. May be applied up to day of harvest.

**STRAWBERRIES:**
Botrytis (gray mold), leaf spot—Apply by broadcast spray at 3 to 6 lbs. Captan 50-WP per acre in sufficient water for thorough coverage by ground equipment or in 10 to 20 gallons of water by air. Begin applications when new growth starts in the spring and before fruit starts to form. Repeat at 7 to 14 day intervals. Under conditions favorable to fruit rot, continue applications through harvest period treating immediately after each picking. Do not apply more than 48 lbs. per year. May be applied up to day of harvest.
Note: Restricted-entry interval is 24 hours.

When calculating application rates, if analytical services are not available to determine the exact quantity of Captan 50-WP remaining in the mixture, assume the following limits for the amount of product to be applied per application:

For broadcast application:

\[
\text{Plant Bed Width (inches)} \times \text{Row Spacing (inches)} = \frac{\text{Broadcast rate per acre}}{\text{Banded rate of Captan 50-WP per acre}}
\]

**SPECIAL USES**

**PEACH PREPLANT ROOT DIP (California):** Preventative preplant dip treatment for crown gall. Use 4 pounds Captan 50-WP plus 3.2 pints diluted sodium hypochlorite (5.25% household bleach) per 100 gallons of water. Wash nursery trees to remove soil from roots. Cut off all dormant buds and suckers in crown area and prune root system if necessary. Submerge the entire dormant tree for 5 minutes. Recharge dip during operation at a rate of 3.2 pints diluted sodium hypochlorite per 100 gallons of water.

**POSTHARVEST FRUIT APPLICATION:** For control of various molds and storage rots (Botrytis, Gliosporium, Rhizopus). Use as a postharvest dip or spray wash on the following fruits: Apples, Cherries, Pears—Use 2 1/2 lbs. Captan 50-WP per 100 gallons of water. Apply as a spray or in a dip tank. When used as a dip, rewash wash solution periodically when tank volume is reduced by 25%. Bring water back to volume and add 2% lbs. Captan 50-WP for every 100 gallons added. At end of every 8 hour shift, empty tank, flush and charge with fresh dilution. Do not allow dip tank solution to stand overnight. Maintain continuous agitation during dipping operation.

**DISPOSAL OF LEFTOVER POSTHARVEST TREATMENT MIXTURE:** Leftover dip or spray mixtures containing Captan 50-WP may be used as a foliar spray for the same crop in case of apples and cherries (but not pears) that were treated by the dip or spray mixture, or to registered turf and ornamental sites: observing all restrictions such as maximum pounds applied per application and season.

When calculating application rates, if analytical services are not available to determine the exact quantity of Captan 50-WP remaining in the mixture, assume that the tank still contains 2.5 pounds of Captan 50-WP per 100 gallons of water. If the dip or spray mixture contains other pesticides in addition to Captan 50-WP, refer to the product label(s) for information regarding disposal.

Captan 50-WP wastes are acutely hazardous to the eyes. Improper disposal of spray or dip tank mixtures is a violation of Federal law. If the leftover dip or spray mixture cannot be disposed of in the manner prescribed above, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance concerning the disposal of spent or excess dip tank mixtures.

**ORNAMENTALS**

**USE PRECAUTIONS**
Do not apply spray to ornamental plants listed below beyond the point of drip from the leaf surface. When applying as a drench, apply only sufficient mixture to wet the surface of the soil except when the dose is specified in terms of volume of mixture per square foot of area.

**AZALEAS**
Damping-off of cuttings—Use 4 lbs. Captan 50-WP per 100 gallons of water. Dip cuttings before bedding.
Petal blight—Use 2 lbs. Captan 50-WP per 100 gallons of water. Apply to soil area around plants and spray flowers just before bloom. Repeat at 7 to 14 day intervals through bloom.

**BEGONIAS (Tuberous)**
Damping-off, tuber rot—Use 4 lbs. Captan 50-WP per 100 gallons of water. Dip tubers for 30 minutes, drain and plant.

**CAMELLIAS**
Petal blight—Use 1 lb. Captan 50-WP per 100 gallons of water. Apply to drench soil around plants beginning when flowers start to open. Repeat at 7 to 10 day intervals through bloom.

**CARNATIONS**
Alternaria leaf spot, rust—Use 2 lbs. Captan 50-WP per 100 gallons of water. Begin application at first sign of disease. Repeat at 7 to 10 day intervals. Shorten intervals during frequent rains and heavy dews.
Damping-off of cuttings—Use 4 lbs. Captan 50-WP per 100 gallons of water. Dip cuttings before bedding.

**CHRYSANTHEMUM**
Botrytis flower blight, Septoria leaf spot—Use 2 lbs. Captan 50-WP per 100 gallons of water. Apply at first sign of disease. Repeat at 7 to 10 day intervals. Apply at green bud, popcorn, bloom and petal fall stages. Repeat in cover sprays as conditions warrant.

**DICHLORDRA (California only)**
White mold (Sclerotinia rolfsii) —Use 2 lbs. Captan 50-WP per 100 gallons of water. Apply 1 gallon of spray per 10 square feet. Make 2 to 3 applications at 7 day intervals.

**GLADIOLUS (Corms)**
Corn rot and decay, dashing-off—Use 0.5 to 1.5 lbs. Captan 50-WP per 10 gallons of water, dip corms for 20 to 30 minutes. Drain and plant.

**GRASSES (Ornamental in Non-Pastured Areas Only)**
Leaf spot, damping-off, brown patch, melting out, seedling blights, and brown spot on St. Augustine grass—Use 2 lbs. Captan 50-WP per 100 gallons of water. Apply 10 gallons spray per 1,000 square feet. Begin when growth starts in spring. Repeat at 7 to 14 day intervals throughout season. Do not graze treated areas or feed clippings to livestock.

**GRASSES (Lawn Seedbeds)**
Damping-off and other soil borne diseases—Use 0.25 to 0.33 lb. Captan 50-WP per 1,000 square feet or 2 lbs. Captan 50-WP per 100 gallons of water, using 15 gallons spray per 1,000 square feet. Cultivate into upper 3 to 4 inches of soil before planting.

**ROSES**
Black spot, Botrytis blossom blight—Use 2 lbs. Captan 50-WP per 100 gallons of water. Begin at first growth or first sign of disease. Repeat at 7 to 14 day intervals, and more frequently during frequent rains and heavy dews.

**SOIL AND GREENHOUSE BENCH TREATMENT**
Preplant treatment for damping-off, root rot diseases on seedlings or transplants of roses (and other shrubs, trees, flowers), and lawn seedbeds—Use 2 lbs. Captan 50-WP per 100 gallons of water at a rate of 15 gallons spray per 1,000 square feet. Cultivate into upper 3 to 4 inches of soil before planting.

**NOTICE TO BUYER AND USER:**
Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal use conditions, or under conditions not reasonably foreseeable to Seller, and Buyer and User assume the risk of any such use. SELLER DISCLAIMS ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING ANY WARRANTY OF FITNESS OR MERCHANTABILITY. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER’S SOLE LIABILITY AND BUYER’S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

This product is sold only for uses stated on its label. No express or implied license is granted to use or sell this product under any patent in any country except as specified: Country, United States.

Manufactured by: MICRO FLO COMPANY
