- After removing the poly coated paper backing, **ZIP UP™** is applied to the desired access area.
- With a razor knife, the cut is made creating access!

- A single **ZIP UP™** forming a slot or flap is the simplest application.
- Two units spaced apart will create an opening that can be rolled up for even more access. This is very useful for moving materials and equipment into sealed areas. This enables the user to reduce the spread of dust and debris, as well as conserving energy.
